

Ironclad Construction Template

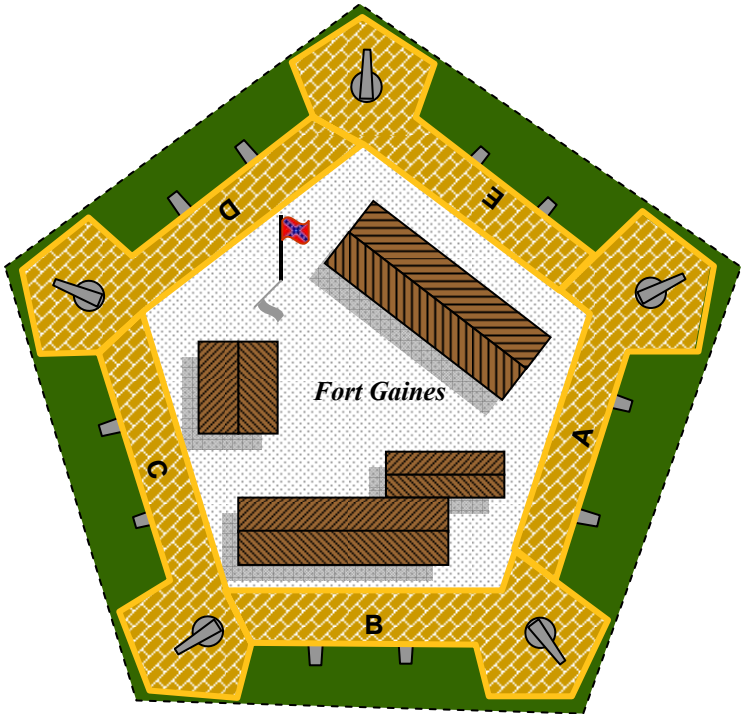

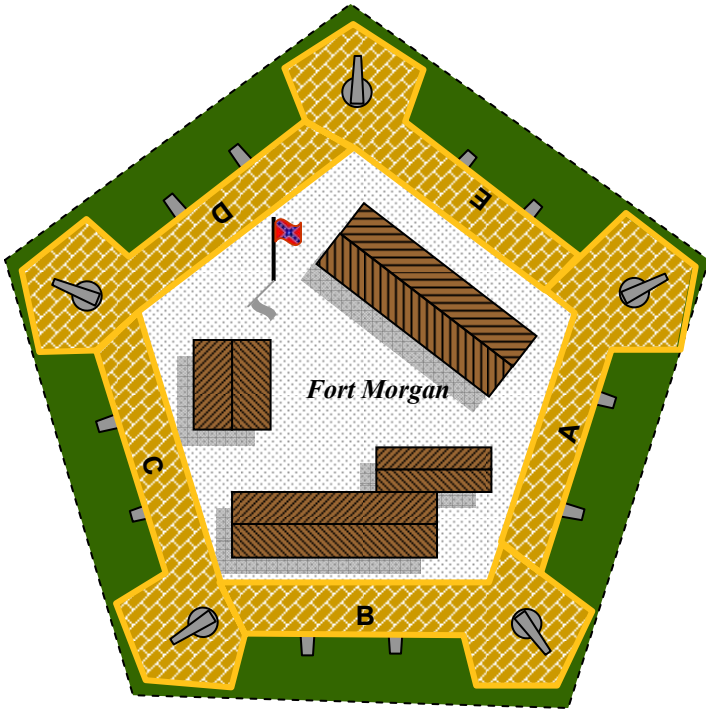

Builder Notes for Ocean Going Ironclads

Max added weight – 180 tons. Max guns – 14, Max Armor – 12”, Max Boilers – 4. Must have at least 1” armor, 1 boiler & stack. Turrets can have 1-2 guns. Ram weighs 10 tons. No spars allowed. Draft (depth in water) in feet equals added weight divided by 20 (example: adding 160 tons to a ship results in an 8 ft draft). Color in parts to your design, cut out, fold, trim away portions not used, but do not shorten the base. Don’t forget to color the flag! Blue for the North, red for the South. Flags mark the stern (back) of the ship, anchors are at the bow (front).

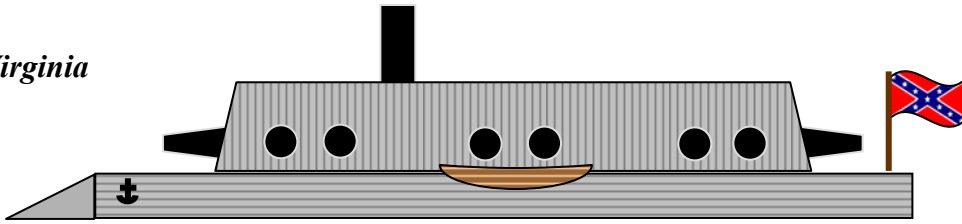

Builder Notes for River Ironclads

Max added weight – 120 tons. Max guns – 8, Max Armor – 10”, Max Boilers – 4. Must have at least 1” armor, 1 boiler & stack. Turrets can have 1-2 guns. Ram weighs add 10 tons. Spar torpedo does not add weight. Cannot have both ram and spar. Draft (depth in water) in feet equals added weight divided by 20 (example: adding 160 tons to a ship would result in an 8 ft draft). Color in parts to your design, cut out, fold, trim away portions not used, but do not shorten the base. Don’t forget to color the flag! Blue for the North, red for the South. Flags mark the stern (back) of the ship, anchors are at the bow (front).
